CS410 Project Proposal

Team Members:

- Xinpei Jiang, xinpeij2 (individual team)

Topic:

- Text Classification Competition

- I plan to learn and use state-of-the-art neural network classifiers in the competition.
- Such state-of-the-art methods might include deep neural networks like CNN, RNN, LSTM, or the NLP transformer models like Google's BERT,
- I also plan to learn and use deep learning frameworks like TensorFlow in which I might apply libraries like Keras.
- I plan to use Python for this project.
